## PROJECTS

### 1. TGen-Transational Genimics Research Institute

Most of departments in TGen used to use Excel for data entry and report. We had upgraded the business processes from Excel to Salesforce Cloud. Successfully Implemented of Sales Cloud and customized pages for Report and Dashboard as Leaders wanted. With Salesforce roles and permissions data is secure and will be visible to assigned departments. The application is mobile friendly and report and dashboard can be downloaded in many popular format.

Key features implemented in the project:

- Customization of the Lead and Pipeline management process.
- Opportunity creation and stages customization.
- Standard Reports and Dashboards creation.
- Lightning reports and Dashboards.
- Implementation of JavaScript and CSS for UI.

#### Roles and Responsibilities

- Developed Triggers, Visualforce Page along with their handlers.
- Developed Lightning Components.
- Developed Apex classes to achieve business requirements.
- Responsible for writing test classes.

#### Language/Tool:

Workflows, Triggers, Batches, Validation Rules, Process builders, Salesforce Admin, CSS, JavaScript, Visualforce Page, Apex Class, Salesforce Lightning, Jira

### 2. Visit Management App

The project is to develop a Management App, where user can create event by simply dragging Accounts on Calendar and they can update and delete any event by just clicking over it. Custom calendar will show all the events based on months and years. User can also check-in and check-out visit from their current Location.

**Technologies Involved:** Visual-force Page, Lightning Component, Apex Class, JavaScript, CSS.

**Roles and Responsibilities:**

- Involved in group for requirement gathering throughout the planning and implementation.
- Developed Components to run this functionality.
- Worked with various salesforce.com Custom and Standard objects like Accounts, Events.

**3. Cosmic Technologies**

The project is to develop an Application, where user can convert lead into opportunity, Account and Contact. In this we have sales reps and they can do one to one chat with their opportunities and send direct messages on their WhatsApp number.

**Technologies Involved:** Batch Class, Salesforce Admin.

**Roles and Responsibilities:**

- Involved in group for requirement gathering throughout the planning and implementation.
- Developed Components to run this functionality.
- Worked with various objects like Accounts, Contacts, Lead, Opportunity, Product and Quotes

**4. World Learning**

The project is to develop an Web Application, where user can login to the different portal/programs by using profiles and Sites . In every Portal there is many lightning tabs/pages where any student can select any courses and apply for the admission .In this Admin will select the student who is eligible for the program and then student need to pay for the selected program after then he/she will be selected for the couse they applied.

**Technologies Involved:** Lightning Component, LWC,Vf pages,Batch Class, Salesforce Admin.

**Roles and Responsibilities:**

- Involved in group for requirement gathering throughout the planning and implementation.
- Developed Components to run this functionality.
- Worked with various objects like Accounts, Contacts, Lead, Opportunity, Many Custom Objects
