PROJECTS

- **Sales Insight Navigator (Nov 2024)**
 - Developed the Analysis Project to analyze supermarket sales and revenue using different Microsoft Azure Services and Power BI. It involves uploaded datasets to Azure Data Lake Storage (ADLS) Gen2, designed an Azure Data Factory (ADF) data flow for data transformation.
- **Weather Forecast Application (Jun 2023–Jul 2023)** Team Count: 4
 - Developed a robust weather forecasting application that uses the OpenWeatherMap API, JavaScript, CSS, and HTML. It provides a detailed overview of various weather parameters, including temperature, humidity, and wind speed for a given location, along with up to five days of forecasting.
- **Wireless Sound Control (Jan 2023-Feb 2023)** Team Count: 2
 - This project is designed to enable touchless control of audio playback and volume adjustment using hand gestures by leveraging computer vision and machine learning. We use Python libraries such as numPy, mediapipe, matplotlib, cv2 and math.

EXPERIENCE

- **Girikon** July 2025-Present
 - Software Trainee in the development department. Currently undergoing training to gain practical skills in software development. Learning programming languages, development tools, and company workflows.

ACHIEVEMENTS AND CERTIFICATION

- Qualified **GATE-CSIT** exam in 2024.
- Python essentials by Cisco Networking Academy.
- Data Science Foundations by GreatLearning.
- Total 6 collective Web Development Certificates.
- Problem Solving (Intermediate and Basic) by HackerRank.

ADDITIONAL INFORMATION

- Daily problem solving streak of over **450** days on Leetcode.
- **700+** coding problems solved across various coding platforms.
- 4-star in C++, Python, Problem Solving and SQL on HackerRank.
